Nate Nartey, P.E., Has Joined The Sustainable Performance Solutions Team

Sustainable Performance Solutions LLC (SPS) announced today that Nate Nartey, P.E., has joined their team. Nartey has mechanical and plumbing design engineering and HVAC/plumbing construction management experience on a wide range of projects including commercial office buildings; hospitality facilities; multi-family housing; retail (including grocery); auditoriums; warehouses; and religious institutions. He has also worked with commercial energy software and will be assisting SPS' clients with energy modeling, energy audits and other energy studies. Prior to going on his own, he had previously worked for several Florida engineering firms including Hammond and Associates; Henz Engineering; and TLC.

"Nate brings diverse experience and a lot of excitement to our team and I'm really looking forward to working with him. Having Nate will allow us to do a better job of serving our existing client base and will also permit us to pursue additional projects that we might otherwise have had to pass up," said Larry Clark, principal of SPS.

Nartey is a graduate of the University of Florida and is a registered Professional Engineer in Florida. He is also a member of several professional organizations including ASHRAE.

About Sustainable Performance Solutions

SPS is a South Florida-based consulting firm that provides energy audits, general energy efficiency and sustainability consulting, sustainability gap analysis (including LEED) and metering/sub-metering/M&V services for non-residential buildings, and advanced ventilation strategies for facilities with critical indoor environmental quality requirements. For more information about SPS, visit www.SustainFlorida.com or call 570-854-1199.
